

Device for Controlling a Forager Chute

ABSTRACT OF THE DISCLOSURE

A control device and corresponding method for controlling a transfer
5 device on a harvesting machine are disclosed. The transfer device is arranged at a
distance adjacent to a housing part so as to be rotatable about a vertical axis and,
to alter the height setting, elevatable about a horizontal axis. The control device
includes a rotation range limiting means that limits the maximum permitted pivot
range of the transfer device as a function of the height setting of the transfer
10 device.
